

ABSTRACT OF THE DISCLOSURE

A method, apparatus, and article of manufacture for transferring credits from one gaming device to another via the use of coded scrip is disclosed. The method comprises the steps of accepting a cash-out command in the gaming device, scanning a magnetically manifested code uniquely identifying a scrip stored in the gaming device, transmitting a cash-out message comprising the code to a remote processor having access to a database configured to store and retrieve codes from a plurality of gaming devices, receiving a scrip dispense message from the remote processor, and dispensing the scrip. The apparatus comprises a scrip storage unit, a scrip dispensing unit having a scrip transducer for reading and recording a magnetically manifested code on a scrip retrieved from the scrip storage unit, and a processor, communicatively coupled to the scrip transducer and a remote computer having access to a database for storing and retrieving code information from the plurality of gaming devices.
